În intervalul anilor 80-ale, după o perioadă lungă de timp în care se realizaseră doar câteva proiecte de dezvoltare a energiei nucleare, apar din nou proiecte de dezvoltare a energiei nucleare în România. În anul 1980, la inițiativa Ministerului Energiei, s-a creat Comisia Națională de Energie Nucleară (CNE), care a avut ca scop să studieze și să realizeze proiectele de dezvoltare a energiei nucleare în România. În anul 1981, CNE a prezentat un raport intitulat "Proiectarea și construirea unei centrale nucleare în România", în care se prezintă o analiză detaliată a posibilităților de dezvoltare a energiei nucleare în România. Raportul este structurat în două părți: prima parte prezintă o analiză generală a energiei nucleare, iar a doua parte prezintă o analiză detaliată a proiectului de dezvoltare a energiei nucleare în România. Raportul este un document important care a pus bazele dezvoltării energiei nucleare în România.
